Introduction

Pinnacle Creative was established in 2013 by Rob Pinnington, he started the business with a view to offering high quality graphic, web and exhibition design services to local, national and international business.

Since then he has built a successful design agency offering the above, but far more besides. Pinnacle now offer a huge range of services, but quality and value for money still remains the linch pin of their offering.

ABOUT US

Rob and Ryan first met at an exhibition company where we produced 'mass-market' visuals at a very fast pace, often turning around visuals in minutes rather than hours.

Although this was an exciting and dynamic business, we felt our skills could be put to better use.

Pinnacle offer high quality exhibition visuals that not only have an eye for detail, they are designed with construction in mind, with designs that are not only stunning, but practical too.

SERVICES

With a great deal of experience in exhibitions, we can guarantee that our design will meet your brief, meet your budget and most importantly, will show your brand off in an outstanding way.

You will receive a number of different angles, along with detailed plans and drawings.

Whether you're just after a design or you want us to quote to build the stand, we'll be completely transparent with our costs, and you will get exactly what you pay for.

PROCESS

It generally works best if you have an idea of what it is you're after, though we can simply work to a budget.

After receiving a brief we'll sit down and work out how the area will work, we'll come up with a layout where everything required will fit together and we will demonstrate how the visitors will 'flow' through your stand,

We then progress to full 3d modelling as you will see on the pages throughout this document. Designs can be provided in a pdf, with or without your own branding, and the detailed plan included too.

EXTRAS

Let's be honest - everybody loves something a little bit more creative, and we're no exception.

We have a few options that take exhibition design to the next level:

Panoramas - these works particulaly well with island and enclosed stands, get a view from the centre of the stand that you can manipulate and control, on phone, tablet or computer.

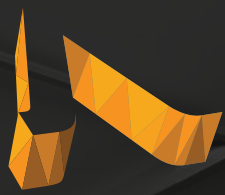

Fly-Throughs - Simply a video of your stand space.

Augmented Reality - Through a tablet you can manipulate your stand in 3d rigght before your eyes.

Walk-Throughs - With the latest technology we can provide you with an actual game play based walk through of your stand space, complete with opening doors and stairs etc.
